*Miller Glassworks designs and
builds amazing markerboards.*

MILLER
GLASSWORKS

MILLER
GLASSWORKS

At Miller, we craft premium markerboards that create a visual impact and build collaboration with employees.

For 35 years we've been creating custom glass solutions for architects, contractors, schools, entertainment, co-working spaces and healthcare. We just happen to specialize in markerboards. We don't believe in flooding the market with poorly crafted products. We believe markerboards are tools of collaboration that create a visual impact. Our markerboards last a lifetime because we take the highest pride in the products we produce.

PROJECTION GLASS MARKERBOARD

Projection glass markerboards are dual use products that work with screen projectors and offer glass writeability. Projection glass comes in a matte finish and can be custom tailored to your projectors position or we can provide end-to-end service for complete installation.

Projection Glass Markerboards by Miller Glassworks are available in matte and acrylic solutions based on job needs and markerboard size.

Our SmartMark Glass markerboards feature low-iron tempered safety glass that allow for the perfect optical clarity and writeability. We offer *standard and matte glass solutions*.

- / Glass markerboards utilize 1/4" PPG STARFIRE low iron glass (true color)

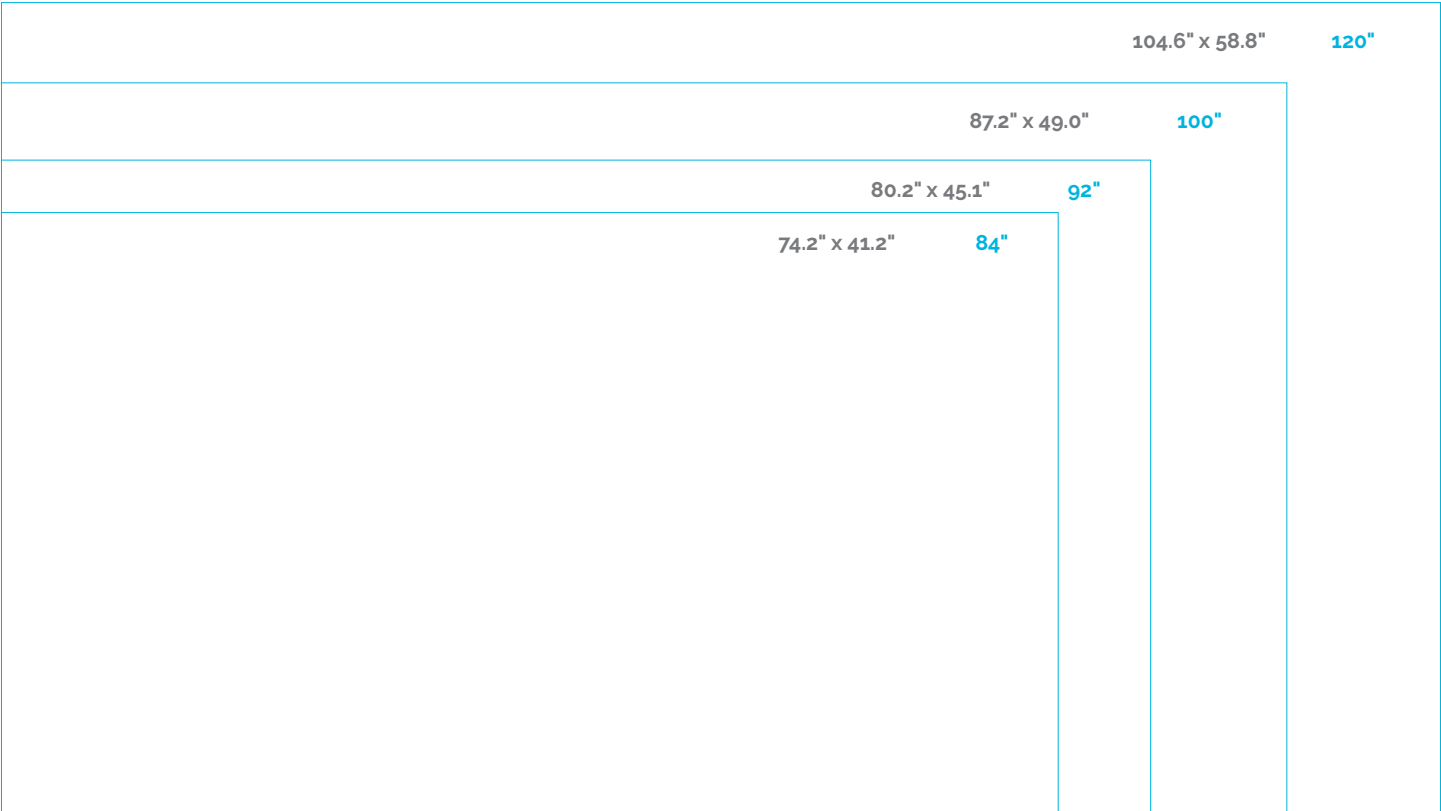

Our SmartMark Acrylic markerboards are lightweight, resistant to breakage and provide easy installation for anyone.

- / Opacifier coat for added durability as well as eliminate the possibility of adhesive or light bleeding through

- / Matte and gloss glass options available

Projection Glass Markerboard Sizes

Projection Glass Markerboards are sized in HD 16:9 ratio
